With OmegaTek™ Productivity Technology

At A Glance

“Cashiers are dragging product across the scanner once and getting the read. They no longer have to twist their wrists to manipulate the item to re-scan product. We managed to untrain the twisting motion they learned years ago and they are telling us they feel better”

—Bob Shoening, CIO, Pathmark

What is OmegaTek™ Productivity Technology?

Omega Tek™ Productivity Technology is comprised of hardware and software innovations that significantly improve scanner performance by increasing the scanning speed and by improving the first pass read rates on hard-to-read bar codes. This yields:

- Improved front end checkout productivity by reducing or eliminating re-scans or no-scans
- Improving customer service by reducing the time a customer has to wait in the checkout line

FEATURES	BENEFITS
• Omega Tek™ Productivity Technology	• Improved reading of hard-to-read bar codes improves front end speed & productivity
• Five-sided, 360° Scanning	• Flexible orientation improves productivity & ergonomics
• All-Weights™ scale platter	• Reduces produce shrinkage by up to 2% of weighed produce
• Enhanced decoding with FirstStrike™ decoding software	• Higher read rate of truncated & hard-to-read labels resulting in improved front-end productivity
• Powered RS-232 auxiliary port	• Allows connection for handheld scanner that eases scanning of large or heavy items
• Low energy consumption. Can be powered from many POS terminals.	• Up to 77% lower energy costs than competition while reducing AC outlets in checkstand
• High level of serviceability & reliability	• High reliability reduces downtime & easy serviceability means faster repairs & more efficient servicing
